PERSONAL PROJECTS

Face Recognition Attendance System (05/2021 - 07/2021)

- Used Python Open CV Library
- OpenCV is a library of programming functions mainly aimed at real-time computer vision.
- Used NumPy to convert our images into some array.
- Used CV2 to read video.

Phone Number Tracker

- Used different Python Modules like geopy, phonenumbers, Pytz, timezonefinder etc.
- For the GUI, I used Tkinter
- When we enter any phone number with proper country code, we get details like operator, current time in the device in which the number is been used, and geolocations

Online Book Store API

- Using Rails I have created the API for the online book store.
- used stripe for the payment.
- used devise and cancan gem the for the authentication
- used JWT for the authorization
- Action mailers is used to deliver mails.

Car Parking Management API

- This was created using Rails
- Has Various role and responsibilities (i.e. Admin, Client etc)
- Use of Devise, CanCan, and various gems .
- JWT was used for the authorization
- Action Mailer is used for sending mails.
